Access to resources from outside

If access to the BUTC's documentary portal, Eliot, is possible from the outside, it isn't the case of all the resources.

Two possibilities :

Access via VPN (Web VPN or Client VPN).

<https://vpnasa.utc.fr>

This service on the UTC's internal network from the outside the university and so to enjoy the same access as if you were at the university.

With VPN, you can then query the database and view the full text of the online resources.

For Web VPN, your e-mail identifiers will be asked you. Once connected, to bring in the URL which you want to visit in the address bar. If you change site, it is necessarily necessary to go back by the address bar.

With the customer VPN on the other hand, your computer behaves as if it was directly connected to the internal network.

Nomade Access :

This service provides access to some databases from outside the UTC and from any computer connected to the Internet, in France and abroad.

The nomade access allows you to view the full text of the resources.

When the nomade access is indicated in the bibliographical notes of the database that you wish to question, copy the adress of the database in your browser, select the University of Technology of Compiegne (or possibly BUTC-SCD) and then authenticate with your email identifiers.

All the resources are not accessible for technical or copyright reasons but the list may grow rich then do not hesitate to visit it regularly.

For any information, contact valerie.basseville@utc.fr

Quelques pistes à explorer...

Eliot, documentary portal of UTC :

Eliot is a web service which allows you to access and use **the whole BUTC paper and electronic collections**.

Its federated search engine will allow you to do simultaneous searches on the whole BUTC collection : **paper resources** (all the BUTC library collection), **electronic resources** (periodicals and books, teacher-researchers articles, theses, reports...) and also **a part of the databases content** (Academic Search Premier, ScienceDirect, Wiley...).

Multiple searches are not needed anymore to find what you search for.

Eliot also provides **personalized services** : beside the famous shopping basket and the research history, it allows you to consult your account reader, to **create your own alerts and to configure them**. It also offers many online services : request for items in the stacks, interlibrary loans and acquisition requests.

Now, you don't need any more to go to the BUTC to drop off your forms !

To consult it, connect you on : <http://bibliotheque.utc.fr> and to use all its potentialities, you only need to **"login"** (email identifiers).

Modalities of identification

You are members of the UTC, enter your name and your email password.

Some tracks to be investigated...

Catalogue of digital resources AtoZ

(On the library portal, click on " online Resources " in the tab " Explore the resources ")

To make it easier with the identification and the search of online resources, the University Library established a catalogue which counts not only all the digital resources (magazines and electronic books) the library has subscribed to but also the ones present in the database.

The link to access to the site:

<http://atoz.ebsco.com/titles.asp?Id=K10633&sid=16330683&TabID=2>

We can consult the list of the resources through the alphabetical keypad, search for a resource (title, editor, ISSN, subject or all titles), select a subject or use the index of the principal editors or access providers.

To help you use this service ; consult the tab "A propos de ce site":

The screenshot shows the 'A to Z' interface of the digital resources catalogue. At the top left is the UTC logo (Université de Technologie Compiègne). The page title is 'Catalogue des ressources en ligne de la BUTC'. Below the title are navigation tabs: 'Index', 'Titres', 'Sujets', 'Recherche', and 'A propos de ce site'. A note states: 'Note: Certaines fonctionnalités (Onglets, Sujet, ISSN, etc.) peuvent être désactivées en fonction des paramètres de votre administrateur.' The main search area includes an 'A to Z' keypad with letters A-Z and numbers 1-9. Below the keypad is a search bar with 'Recherche' and 'Recherche avancée' buttons. A dropdown menu shows 'Titre(s) commence(nt) par JO: 143' and 'Liste des pages : 1. "JoC Week" to "Journal of Visual Art Practice"'. The results list includes: 'JoC Week', 'John Hancock Financial Services, Inc. SWOT Analysis', 'Joint Bone Spine', and 'Joint Force Quarterly : JFQ'. On the right side, four numbered callouts explain the navigation options: 1. 'Onglet Index' for displaying the list of bases; 2. 'Onglet Titres' for browsing titles; 3. 'Onglet Sujet' for navigating by subject; 4. 'Onglet Recherche' for advanced search features.

Some tracks to be investigated..

Techniques de l'Ingénieur :

(On the library portal, click on "Databases" in the tab " Explore the resources " or make a research)

It is a technical online database which offers to the engineer a synthetic information in various fields such as mathematics, chemistry, electronic, materials or the environment.

On this website, there is an access to the entire library collection which is regularly updated. That is to say around 3500 articles written by the best specialists.

Some tracks to be investigated..

EBSCOhost Databases :

(On the library portal, click on "Databases" in the tab " Explore the resources " or make a research)

EBSCOhost permits to interrogate, simultaneously or not, 3 databases and offers links to the full text of the reviews which propose it ; with an embargo period which can last from 6 months to one year:

Academic Search Premier

It is a multidisciplinary database which proposes the access to 8211 specialized magazines title, including 4648 with full text (with an embargo which sometimes can last until 12 months).

GreenFILE

This database deals with sustainable development issues and fields dedicated to environmental thematics such as: global warming, reducing the energy consumption, natural resources, biological agriculture, car fleets with hybrid motors, industrial waste management, pollution or even laws, regulations and environmental studies. The origins of the suggested documents are academic, governmental and from general interest; and they deal with the effect of humans, companies, local and national governments on the environment; and with what each can do at his level to minimize these effects.

Psychology and Behavioral Sciences Collection

It's a database dedicated to the psychology, proposing 560 reviews in complete text and covering the following subjects: characteristics emotional persons and behavioral, psychiatry and psychology, mental processes, anthropology and methods of observation and experimental.

Ebook Collection

EBook collection offers the access to more than ebooks 11 000 in complete text in numerous domains. Only the recent ebooks in the field of the engineering, of the energy, of the green chemistry and of the technologies of the environment is accessible or more than 200 works.

For more information, consult the tutorial of the Catholic University of Louvain :

Du bon usage de la documentation électronique...

The library has subscribed to approximately 50 bibliographical or textual databases. We can access it for free, but we have to pay for the printing. Many resources (books, periodicals, databases...) are now accessible online from all computers connected to the UTC network.

The access licenses to these resources, signed by the University Library, assume the respect of some terms of use :

- The access to the electronic resources is reserved to the UTC members (staff members and students).
- The use of the resources is strictly professional: limited to educational, research and administration activities.
- Massive downloading of data (with spam or other techniques of automatic downloading) is forbidden.
- The documents can be printed or saved, in the limits of fair use and for non commercial and strictly private use. It is especially prohibited to distribute copies to someone else than the authorized users; whatever the form (paper or electronic).
- Documents cannot be modified, adapted, transformed or translated; nor used in a way which could infringe the copyright or other related property rights.

The providers of these resources reserve the right to cancel the contract or to prohibit access to these resources in case of misuse of the service and/or its content.
